WORK EXPERIENCE

Trace Theory to Trade | T2T Colombo 10, Sri Lanka

Intern Software Engineer June 2024 – December 2024

- Collaborated with a cross-functional team to develop a **frontend feedback component** using **Next.js** for a **digital logbook system**, enabling mentors to review student activities and improving feedback quality.
- Designed and implemented a **testing framework using Jest**, achieving 95% test coverage, which increased system reliability by 20%.
- Built **backend functionality** for exporting bulk activity reports as excel sheets, streamlining data access for academic evaluations.
- Developed customizable **template components** using **React.js** for a **forms management system**, reducing form creation time for organizations.
- Optimized database management with **PostgreSQL** and **Prisma ORM**, enhancing data retrieval and storage efficiency.
- Worked closely with team members to develop **RESTful APIs** for user, organization, and template management using **NestJs**, achieving a 99% success rate in CRUD operations.
- Integrated **JWT-based authentication**, enhancing platform security and usability.
- Designed an **admin dashboard** using **PHP Laravel** for an **online bookstore** system, boosting book inventory management efficiency.
- Partnered with **stakeholders** to gather requirements and ensure the solution aligned with business needs.
- Collaborated in using **AWS, Azure DevOps, GitHub**, **Docker** for automating and streamlining software development.

SKILLS

- Languages - Java, Python, JavaScript, Go Lang, C++
- Libraries/Frameworks - React, Node.js, Express.js, PHP Laravel, NestJs, Java Springboot
- Database Management - MySQL, MongoDB, PostgreSQL, Prisma ORM
- DevOps and Tools - Docker, GitHub, Postman, Azure DevOps, GCP, Kubernetes, WordPress
- Soft Skills - Good communication, Problem-solving, Decision-making, Teamwork

EDUCATION

Open University of Sri Lanka **2021-2025**

Bachelor of Software Engineering Honors

- Expected Graduation – November 2025
- Relevant Coursework - Programming Languages, Web development, Data Structures and Algorithms, OOP, Computer and Network Security, Quality Assurance and Software Testing

PROJECTS

Aura Store | Link

- Designed and developed a **fully responsive e-commerce web application** enabling users to seamlessly browse, purchase products, and manage orders.
- Integrated **cart functionality and order tracking** to enhance user experience and streamline purchase management.
- Implemented **secure user authentication and authorization** using industry-standard practices, ensuring data protection and system integrity.
- Built with **React.js, Node.js, Express.js, MongoDB, RESTful APIs** and **JWT authentication**.

Epic Reads | Link

- Developed a full-featured **online bookstore** web application enabling users to browse, search, and purchase books.
- Implemented responsive frontend with a robust Laravel backend for **managing book inventory, user authentication,** and **order processing**.
- Built using **React.js, PHP Laravel**, **MySQL** and **RESTful APIs**.

Stock Mate

- Built a responsive and **scalable stock management system** to track inventory for a clothing shop.
- Containerized the application with **Docker Compose** for deployment.
- Implemented basic **unit and UI tests** for reliability.
- Built using **React.js, Spring Boot, MySQL** and **Docker**.

CERTIFICATIONS

- Postman API Fundamentals Student Expert Certificate – Postman Academy
- Build a Full Website using WordPress - Coursera
- Gen AI 101 with Pieces – Pieces for Developers

ACHIEVEMENTS

- Contributed to Hacktoberfest 2024 and GSSoC24 Postman Challenge GitHub Repositories.
- Created an AI-powered image recognition system for a personal project.

INTERESTS

- Open-source contributions on GitHub
- Exploring AI & ML in web applications
