WORK EXPERIENCE

Intern Software Engineer
Trace Theory to Trade (T2T) - Colombo, Sri Lanka June 2024 – December 2024

- Collaborated with a cross-functional team to develop a frontend feedback component for a digital logbook system, enabling mentors to review student activities and improving feedback quality by 30%.
- Designed and implemented a testing framework using Jest, achieving 95% test coverage, which increased system reliability by 20%.
- Built backend functionality for exporting bulk activity reports as excel sheets, streamlining data access for academic evaluations.
- Developed customizable template components for a forms management system, reducing form creation time by 40% for organizations.
- Worked closely with team members to develop robust APIs for user, organization, and template management, achieving a 99% success rate in CRUD operations.
- Integrated JWT-based authentication, enhancing platform security and usability.
- Designed an admin dashboard with analytics for an online bookstore system, boosting book inventory management efficiency by 50%.
- Partnered with stakeholders to gather requirements and ensure the solution aligned with business needs.
- Collaborated in using cloud services for hosting and DevOps tools for automating and streamlining software development.

PROJECTS

Aura Store - Link

- Designed and developed an e-commerce web application as a personal project enabling users to seamlessly browse, purchase products, and manage orders.
- Integrated cart functionality and order tracking to enhance user experience and streamline purchase management.
- Implemented secure user authentication and authorization using industry-standard practices, ensuring data protection and system integrity.

Healthcare Management System - Link

- Developed a healthcare management web application to manage appointment booking for doctors and patients.
- Implemented a user-friendly interface for both patients and healthcare providers.

EDUCATION

Open University of Sri Lanka
Bachelor of Software Engineering Honors
2021 - 2025

- Expected Graduation – November 2025

- Relevant Coursework - Programming Languages, Web development, Data Structures and Algorithms, OOP, Computer and Network Security, Quality Assurance and Software Testing

SKILLS

Programming Languages	-	Java, Python, C++, C#
Libraries/Frameworks	-	React, Next.js, Angular, PHP Laravel, Python Django, NestJs
Database Management	-	MySQL, MongoDB, PostgreSQL, Prisma ORM
DevOps & Tools	-	Docker, Git, Postman, Azure DevOps, AWS, Kubernetes, Terraform
Soft Skills	-	Strong communication, Problem-solving, Decision-making, Teamwork
Languages	-	English(Proficient), Sinhala(Native), Japanese(Basic)
