WORK EXPERIENCE

DigitalBee Labs – Software Engineer Intern

January 2025 – July 2025

- Improved product website performance with SEO-focused optimizations to enhance visibility and search ranking.
- Developed and maintained WordPress websites, ensuring responsive design.
- Contributed to frontend development of a Flutter-based healthcare application, integrating APIs to support core user workflows.
- Collaborated using Git and Bitbucket for version control, and team workflows.

Vectorium Labs – Fullstack Developer Intern / Level 1 Fullstack developer

July 2025 – March 2026

- Built and enhanced an admin portal for a HIPAA-compliant healthcare management system, enabling secure management of users, data, and operations.
- Developed full-stack features using Next.js, Express.js, and AWS infrastructure, ensuring scalable and reliable application performance.
- Implemented the reports and analytics module in the client portal of the same healthcare Management system.
- Integrated external healthcare APIs (e.g., PCC APIs) to enable seamless data exchange between systems.
- Collaborated within a team using Git and AWS Workplace, contributing to structured development workflows and deployments.

SKILLS

- Frontend: React.js, Next.js, Flutter
- Backend & APIs: Node.js, Express.js, NestJS, REST APIs
- Databases: PostgreSQL, MongoDB, MySQL
- DevOps & Cloud: Docker, AWS, GitHub Actions
- Languages: Java, Python, JavaScript
- Tools: GitHub, Postman, Jest, Supabase, Firebase

EDUCATION

Open University of Sri Lanka

2022-2026

Bachelor of Software Engineering Honors

- Expected Graduation – November 2026

PROJECTS

Edu Nova | [GitHub](#)

- Built a course enrollment platform for students and instructors to simplify IT course discovery and management.
- Implemented an AI-powered course recommendation chatbot that helped students quickly identify relevant courses based on their interests, reducing manual browsing.
- Designed instructor tools to create, update, and manage courses, improving course publishing efficiency.

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST API, Docker, AWS EC2, GitHub Actions, JWT Auth
