## WORK EXPERIENCE

---

**Vectorium Labs** – Full-stack Developer Intern

July 2025 – March 2026

- Developed a role-based admin dashboard for a healthcare management system using Next.js.
- Implemented secure authentication (JWT) and user management workflows for admin and staff roles.
- Built REST APIs with Express.js and PostgreSQL, supporting core system operations such as users, facilities, resources, and payments.
- Integrated third-party healthcare API (PCC) for external data synchronization.
- Collaborated in an Agile team using Git and AWS WorkSpaces for development and deployment.

## SKILLS

---

- Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Express.js, NestJS, REST APIs
- Databases: PostgreSQL, MongoDB, MySQL
- DevOps & Tools: Docker, AWS (S3, WorkSpaces), GitHub Actions

## EDUCATION

---

- Open University of Sri Lanka - Bachelor of Software Engineering Honors  
Expected Graduation - December 2026 2022-2026

## PROJECTS

---

### Hyper Play - Multi-vendor Sports E-commerce Platform | [GitHub](#) | [Live](#)

- Built a production-style e-commerce system with role-based access for customers, manufacturers, and admins.
- Designed and implemented an order lifecycle management system covering cart, checkout, payment processing, admin assignment, production, and shipping stages.
- Implemented secure JWT authentication with RBAC across all user roles.
- Integrated Stripe (test mode) and AWS S3 for payments and media storage.
- Deployed containerized application using Docker.

**Tech Stack:** React, Node.js, Express.js, PostgreSQL, Docker, REST API, Stripe, AWS S3

### Edu Nova - AI-powered Role-based E-learning Platform | [GitHub](#) | [Live](#)

- An online learning platform with role-based access for admins, instructors, and students using JWT-based authentication.
- Developed an admin dashboard for managing institutes, instructors, and platform operations.
- Integrated an AI-powered assistant (Groq API) to provide real-time course recommendations and learner support.

**Tech Stack:** Next.js, Node.js, Express.js, MongoDB, Docker, REST API, ImageKit
