WORK EXPERIENCE

DigitalBee Labs – Software Engineer Intern

January 2025 – July 2025

- Improved product website performance with SEO-focused optimizations to enhance visibility and search ranking.
- Contributed to frontend development of a Flutter-based healthcare application, integrating APIs to support core user workflows.
- Collaborated using Git and Bitbucket for version control, and team workflows.

Vectorium Labs – Fullstack Developer Intern

July 2025 – March 2026

- Built and enhanced an admin portal for a HIPAA-compliant healthcare management system, enabling secure management of users, data, and operations.
- Developed full-stack features using Next.js, Node.js, Express.js, PostgreSQL, ensuring scalable and reliable application performance.
- Designed and integrated RESTful APIs and third-party healthcare APIs (PCC), enabling seamless system integrations.
- Collaborated within a team using Git and AWS WorkSpaces, contributing to structured development workflows and deployments.

SKILLS

- Backend & APIs: Node.js, Express.js, NestJS, REST APIs
- Frontend: HTML5, CSS3, React.js, Next.js, JavaScript, TypeScript, Flutter
- Databases: PostgreSQL, MongoDB, MySQL
- DevOps & Cloud: Docker, AWS, GitHub Actions
- Languages: Java, Python

EDUCATION

- Open University of Sri Lanka - Bachelor of Software Engineering Honors 2022-2026

PROJECTS

Hyper Play | [GitHub](#) | [Live](#)

- Built a full-stack sports e-commerce platform with multi-role access (customers, manufacturers, admins), enabling end-to-end order management and workflow assignment.
- Implemented secure authentication and authorization using JWT and role-based access control ensuring proper access across user roles.
- Integrated Stripe payment gateway for secure checkout and AWS S3 for scalable image storage and product media management.

Tech Stack: React, Node.js, Express.js, PostgreSQL, Docker, REST API, Stripe, AWS S3

Edu Nova | [GitHub](#) | [Live](#)

- Developed an online learning platform supporting instructors and students with role-based dashboards and course management features.
- Implemented secure authentication and RBAC using JWT, enabling controlled access for instructors (course creation) and students (enrollment).
- Built and integrated an AI-powered course recommendation assistant using the OpenAI API, providing personalized suggestions based on user preferences.

Tech Stack: Next.js, Node.js, Express.js, MongoDB, Docker, REST API OpenAI API, ImageKit
